

**DELIVERING VALUE THROUGH CUTTING-EDGE TECHNOLOGY**

**TECHNOLOGY FACTS**

- AgReliant is the largest independent seed corn company in North America
- We access unique germplasm through our worldwide breeding and research program
- Our fast-track technology creates new, high-yielding hybrids with key biotech traits 70% faster than traditional breeding
- We offer 14 new corn brands and 16 new soybeans for spring 2017 planting

**TECHNOLOGY IN, ON AND BEHIND THE SEED**

In today's agricultural landscape, staying ahead-of-the-curve can help you grow relationships, gain customers and increase sales. Boost your dealership with these cutting-edge technologies:

- Top performing industry genetics and traits uniquely bred for your area

- Advantage Acre® - comprehensive field management, simplified. This precision ag tool is centered around three fundamental components of farming: seed, soil and weather. Facilitate field-by-field discussions based on product, topography and long-range forecasts.

- AgriShield® soybean seed treatment system provides maximum yield protection.

- Online, dealer order system, **Dealer G-live** to manage your dealership, accounts and payments. Generate professional invoices and access brand resources.

- Use our new, updated website to prepare personalized seed guides and plot books for your customers. Receive agronomic updates of timely topics during the growing season through videos and newsletters.

- Your District Sales Manager and Sales Agronomist are equipped with the latest technology and applications on their mobile devices to help you plan, manage and profit.
